

Insulated metal panel solutions | Walk-in coolers & freezers

For Immediate Release

A collaboration that will brighten your day!

[Boucherville, Québec | October 12, 2023] – Norbec and Advanced Glazings Ltd have concluded a partnership to make it easier for architects to bring daylighting to insulated metal panel buildings.

This strategic partnership brings together the Advanced Glazings Ltd technology with Norbec's proven industry expertise.

This partnership, which takes effect on October 12, 2023, reflects the commitment of both entities to their missions, contributing to a more sustainable world. The solution is designed to encourage North American architects to add a touch of daylight to their projects.

By combining their skills, resources and vision, Norbec and Advanced Glazings Ltd are poised to create synergy that will greatly benefit their clients and partners. The benefits of this partnership include:

Accelerated Innovation: Collaboration between the R&D teams of both companies will expedite the development and commercialization of the Integration of tried and proven systems that will naturally light high performance metal buildings enabling quicker responses to changing market demands.

Expanded Reach: By leveraging their respective networks, Norbec and Advanced Glazings Ltd will be better positioned to meet their customers' needs.

Complementary Expertise: The complementary skills of both companies will result in the delivery a more comprehensive and higher-quality solution of translucent panel to their clients.

At the end, it is all about efficiency and it is what the solution will offer:

- **Glare-Free Natural Lighting:** Illuminate spaces naturally, enhancing visual comfort.
- **Natural Light Diffusion:** Distribute sunlight evenly, creating a welcoming ambiance.
- **Thermal Resistance:** Maintain optimal indoor temperatures, ensuring energy efficiency.
- **Robust Water and Air Infiltration Performance:** Enhance building durability and longevity.
- **Long-Lasting Warranty:** Enjoy peace of mind with our extensive product guarantee.
- **Energy Savings and LEED Certification:** Contribute to environmental sustainability while achieving energy efficiency and LEED recognition.

Insulated metal panel solutions | Walk-in coolers & freezers

About **Norbec** :

Norbec manufactures prefabricated cold rooms, insulated doors and insulated metal panels for building envelopes. Founded in 1982, Norbec has earned an enviable reputation as a leader in numerous sectors, including supermarkets, restaurants, food processing plants, refrigerated warehouses, hospitals, and research centers. Norbec's success is built on its high-quality products, exceptional service, and commitment to innovation.

About **Advanced Glazings Ltd** :

Great buildings need a connection to the outdoors, one that is only achieved through the use of glass. At Advanced Glazings Ltd, we understand that making that connection is challenging. Our Solera® line of highly insulating light diffusing glass and decades of combined experience in daylight design make it easy for you to create buildings that are stunning and will 'wow' everyone who enters.
